CONSTVIZ
Project Management **Perfected**

Construction Viz is a flexible, subscription-based construction project management solution powered by technologies you trust

SharePoint **Microsoft SQL Server** **Microsoft Azure**

Overview

Construction Viz includes everything you need to manage your construction projects—document management, dashboards, reports, forms, workflows and more—in one place.

Best of all, a seamless mobile-first experience makes all of these tools available where you need them. You and your team can stay productive in the office and at the remote job site using a fully-responsive interface.

Construction Viz is based on Lydon Solution's award-winning Construction Project Management Portal.

Now your team can use the same platform deployed by several of the largest construction management and utility companies to manage multi-billion dollar projects.

Key Features

Turnkey. Start managing projects right away. There is nothing to install or configure.

Familiar Tools. Keep using the tools you prefer through full integration with Office, Arc GIS, P6 and more.

Secure Collaboration. Work together with secure end-to-end collaboration between internal and external teams.

Cloud-enabled. Be productive in the office or the field with mobile and offline support.

Flexible. Add additional users and features when you need them.

Work from Anywhere on Any Device

Construction Viz keeps you productive in the field:

- Use a fully-customized SharePoint UI.
- Complete forms at your remote construction sites using a tablet or mobile phone.
- No internet? Not a problem. Upload your form data when you are back online with a click of a button.

Leverage Your Existing Tools

Construction Viz integrates with the industry-standard software you use every day, so you can continue working with your familiar applications.

Office   Visio   Project   ArcGIS®   ORACLE® PRIMAVERA

Create Powerful Report & Dashboards

Construction Viz makes it simple to display critical project data in a visually compelling way. Create project reports with dynamic charts, tables, graphs, heat maps and more.

Security Down to the Field

Whether your team is in the office or on the job site, Construction Viz lets you securely share data while controlling user permissions and access rights down to the field level.
